

GENESIS HONEY CO

Single-origin New Zealand Manuka | MGO 700+ | 250g

WHOLESALE & DISTRIBUTION

genesishoney.co/wholesale

TRADE ENQUIRIES WELCOME

ONE HONEY. DONE PROPERLY.

Single-origin New Zealand manuka, graded MGO 700+, in 250g amber glass. Independently tested, and every jar traceable to its own laboratory certificate.

Traceable to the jar

Every jar carries a batch code that resolves to its own certificate of analysis online. Your customer can scan and read the result.

Independently tested

Graded by R J Hill Laboratories, IANZ accredited and internationally recognised through the ILAC arrangement. Not an in-house number.

Retail-ready

Amber glass, foil-blocked label, printed outer carton and a GTIN already allocated. It goes straight on a shelf.

One SKU, no clutter

A single grade at a single size. Nothing to rationalise and a simple reorder line.

CERTIFICATE OF ANALYSIS | BATCH 25-187

MGO
797 mg/kg

DHA
704 mg/kg

HMF
27.0 mg/kg

R J Hill Laboratories, report 3891880, reported 20 May 2025. Full certificate supplied with any sample or order.

TRADE TERMS

Pricing

Provided on application, by market and volume. Tell us the quantity and destination and you will have a landed figure the same day.

Minimum order

Quoted with pricing. Opening orders and trial quantities are both workable — we would rather you tested the product than committed to a container.

Freight

Ex-Sydney, quoted separately. Export documentation prepared per consignment; destination import requirements are the buyer's to confirm.

Samples

Available to genuine trade enquiries. For a premium food product that is usually a faster decision than any document.
